Joxy is not an application itself, but a skin for other programs For installation instructions, please see Joxy's website.. I want to use the look and feel named SyntheticaBlackEye with my java application, so I downloaded the jar files of the look and feel from here then I put the jar file inside the library folder of my project then I set the look and feel like as follows.

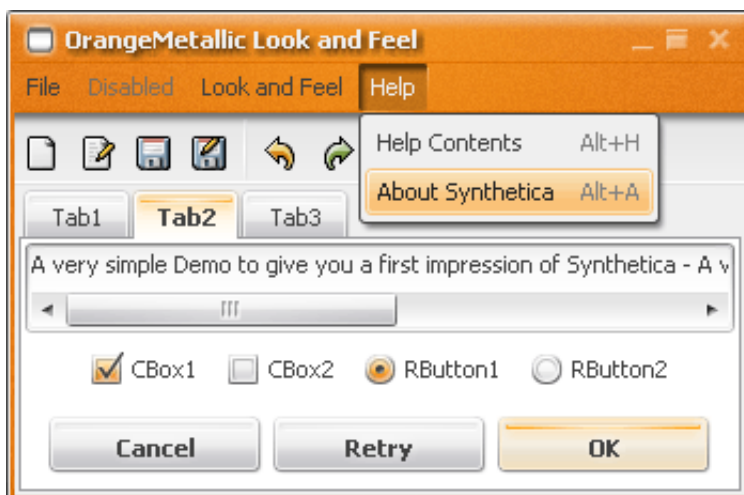

1. [look & feel java](#)
2. [java look and feel themes](#)
3. [java look and feel graphics repository](#)

We've started it offwith some instructions about how to get Java applications to use Napkin fortheir Look and Feel.. By default, Java applications don't follow this theme at all The Joxy Look and Feel is a 'skin' to let Java Swing applications look like the Oxygen theme.. It is released under a BSD-style license. UIManager setLookAndFeel(new SyntheticaBlackEyeLookAndFeel) The KDE desktop environment uses the Oxygen theme by default.. Latest Release: 1 2, 12 May, 2009 Overview The Napkin Look & Feel is a pluggableJava look and feel that looks like it was scrawled on a napkin.
